

Protektor Pro

The Sensible Guard Tour System

Protektor Pro : Makes sense !

- Brings down Guard Tour Monitoring costs. No investment required in hardware. Or software. Or data. Or AMC.
- You can have additional Checkpoints without adding to the cost.
- As breakdown possibility reduce drastically, maintenance related costs are negligible
- As spare device is provided, Solution uptime is 100 percent.
- Real Time Monitoring Data available on the Dashboard.

Protektor Pro : Why it is the better option

- Can be set up by in-house Team.Does not need any external team to visit your location.
- Scanner Devices come preloaded with the necessary software.
- Protektor Pro provides Identity Validation of Guard and ensures Proxy Punching is eliminated.
- Gaming of system is not possible as GPS coordinates of the Checkpoints are recorded.
- Guard can take pictures and/or send textual reports to concerned Team Members in Real Time.
- Based on risk perception,Guard can ensure critical security specific information is conveyed to the right Team Member.

Protektor Pro: Easy to get started

- Stick each laminated QR code panel at the designated Checkpoint.
- Does not need 5 A Power outlets at Checkpoints.No wifi required.Ready to go live within 30 minutes.
- Scanner device is a modified Android Smartphone.
- Weather Proof.The Checkpoints can be anywhere in the open.
- Factory Made Android Smartphone.More rugged.Easier to manage.
- No significant training required.
- Scanner device can be charged from any 5 A outlet.Simple to manage.
- Spare device provided.No Downtime.

Scan Feature

When a Guard on Patrol reaches the Checkpoint at the appointed time, he will scan the QR code, click a selfie of himself , and move on to the next checkpoint. That is all.

[Protector Pro - YouTube](#)

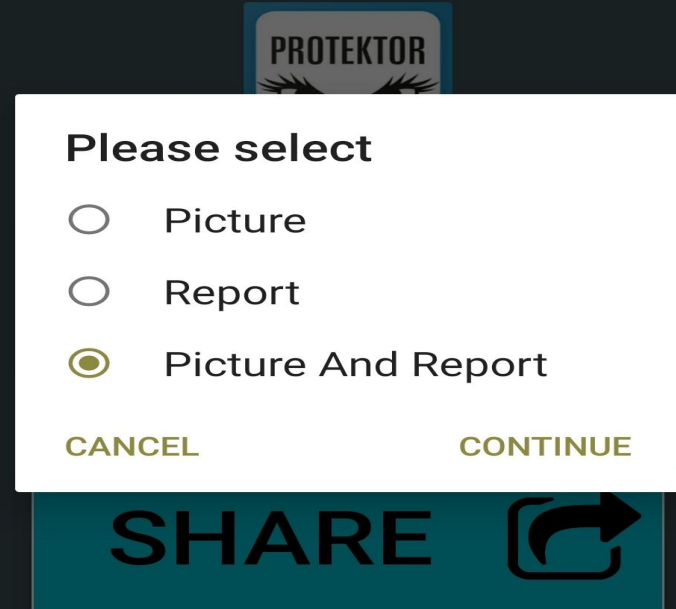

Simple to use. And accurate !

Share Feature

Allows the Guard to record his observations on any significant event observed by him and share his report. He can share a picture. Or a Text message. Or both. This report is visible on the dashboard in real time. And with GPS coordinates to enable swift action.

Observation Reports visible only to those authorised. Secure.

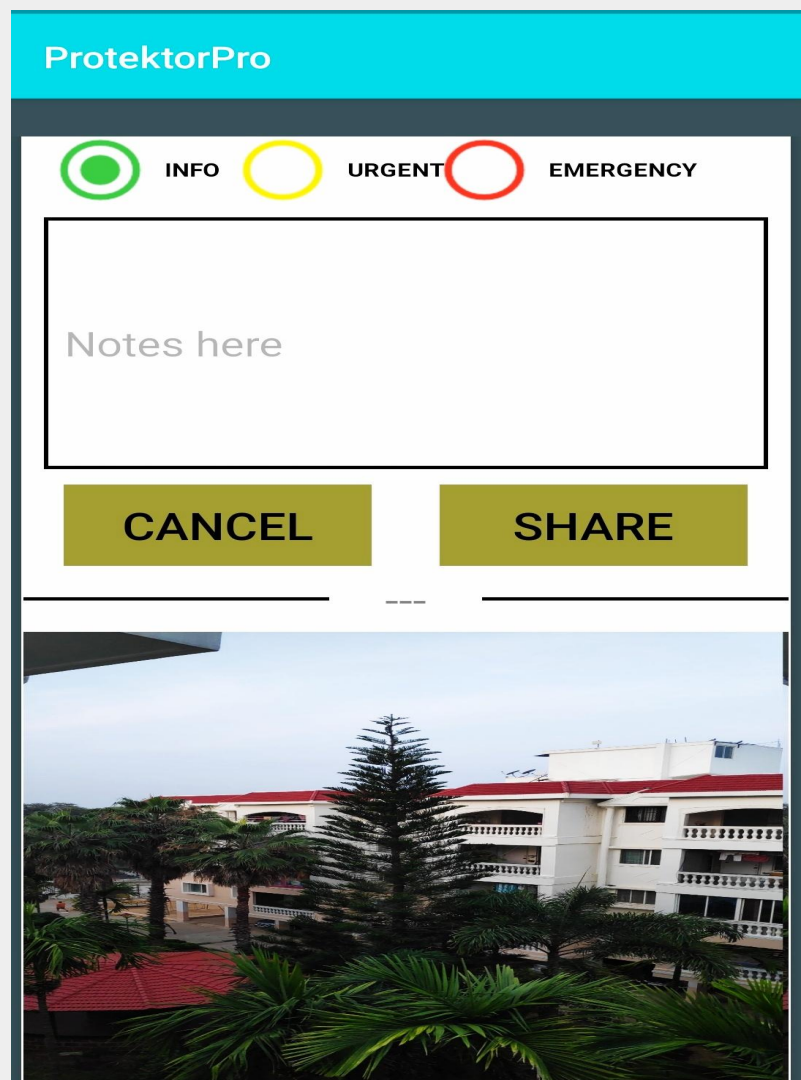

Automatic Escalation

The report is shared by the Guard based on his risk perceptions. If it is for information its Code Green.If any action needs to be taken,it is Code Yellow.And if it is an Emergency, it is Code Red.

In case of Code Red, the Officer in Charge will receive a smartphone notification instantly , enabling him to connect with his Security Team, and respond swiftly to the Emergency.

Helps you react to a potential Emergency Faster .

The Dashboard

All processed data is available on your PC or Smartphone. It includes Guard Tour Patrol Reports and the Observation Reports shared by the Guards.

Allows you access to credible real time data anytime you need it, and from wherever you are.

The Dashboard is accessible to only those who have the requisite credentials.

Improved Efficiency. Enhanced Compliance. Total Objectivity
